

Who can become a member of the ECRR?

Non-commercial organisations working on the development of best practice for river restoration, knowledge sharing and (international) cooperation can become a **member of the ECRR Association**. For more information on ECRR membership, we invite you to scan the QR code below and/or to contact us by email: Secretariat@ECRR.org.

What do we do?

- Connect people and organisations
- Disseminate river restoration information and knowledge
- Support the development of best practices of river restoration

secretariat@ecrr.org

The ECRR association member and partner associations:

Does your organization work on the ecological restoration of rivers?

Join the ECRR.

Learn from the experiences of others.
Share your knowledge. Discover the best practices for river restoration.
Get in touch with other practitioners.

What does the ECRR offer to its members?

For example:

The ECRR is...

The opportunity to **learn** and **define** best practices of river restoration for improved implementation.

Natural Water Retention Measures, Nature Based Solutions and Free-Flowing Rivers

A **diverse range** of **approaches** and **ideas**, helping to broaden one's perspective.

Development or adjustment of national restoration policies, integrated river basin restoration planning and implementation

Creating and promoting opportunities **for networking** to learn and share knowledge.

The European River (restoration) symposia and conferences ECRR (co) organises and members participate in and contribute to

Initiatives for members to **collaborate working** on important common topics.

The ECRR's submissions to the EC's WFD Fitness Check, to the EC's draft Biodiversity Strategy 2030 and Free-Flowing Rivers Guidance and the draft Restoration Law

The **RiverWiki**, an interactive database with more than 1000 projects' data.

Project information such as objectives, techniques, costs, ecosystem benefits, monitoring results and outcomes

Policy studies, policy briefs and reviews **to support policy makers**.

River continuity restoration survey, flood protection policy brief, nature restoration law review, free-flowing rivers guidance, and biodiversity strategy implementation

- A formal network of member organisations and key-partners with the mission to encourage and support ecological river restoration.
- A registered NGO to the EC that reports on its activities to the Transparency Register.
- A network of ca. 2,000 river restoration practitioners in greater Europe.
- A knowledge platform and catalyst for river restoration.
- A community of practice of a growing group of river restoration practitioners, who share their passion and who learn together and with others how to do it better.
- Our audiences are practitioners, including river basin managers, consultants, contractors, NGOs and local volunteers.
